

# Our Country, the Marvel of Nations: Its Past, Present, and Future, and What the Scriptures Say of It (Classic Reprint)

Excerpt from Our Country, the Marvel of Nations: Its Past, Present, and Future, and What the Scriptures Say of It We have a right to presume that every intelligent and patriotic citizen of the Great American Republic, feels an interest in all that pertains to his country - in what it has been, is, and is to be. While he looks with just pride on its past unparalleled progress and noble achievements, and surveys with satisfaction its present position of national exaltation and influence, with its free government, immense wealth, and exhaustless resources, he cannot be indifferent to probabilities affecting its future, so far as they may be legitimately calculated from lessons of history, from principles established in our own Constitution, and from the tendency of influences already actively and widely at work in different parts of our land. In this direction, the mind of every one must turn with peculiar interest; and while many unquestionable conclusions relative to our future may be established on the grounds already referred to, we believe there is another source of instruction, almost wholly overlooked or ignored, which sets forth more explicitly and more fully startling developments which days not far to come have in store for us. It is designed in this work to call particular attention to these matters. We do not purpose here to enter largely into the history of this government. There are works already published which leave nothing to be desired in this direction. Neither is it our object to make in these pages either political economy, arithmetic, or geography, a specialty, though something will be referred to under each head. The leading title of the book is given as The Marvel of Nations; and we propose to inquire somewhat into the significance of this marvel. If we believe that there is a God who rules in the kingdoms of men (Dan. 5: 21), we must look for his

providential hand in human history, in the rise, career, and fall of the nations and peoples of the world.
