

From Path-Dependency to Knowledge-Based Economy - Analysing the Finnish Ict Miracle -

Essay from the year 2005 in the subject Politics - International Politics - Topic: Globalization, Political Economics, grade: 1,7, University of Munster, course: European Economic Policy Course, 14 entries in the bibliography, language: English, comment: Analysing the Finnish ICT industry Essay for a Masters course in European Studies at the UT's Twente/Munster , abstract: The fact that Finland is far away from the centres of European economic activities, for example the so-called blue banana, the Sunbelt and the Industrial axe, its relative economic success, especially in the field of information and communication technologies (ICT) makes it so interesting to analyse what is so characteristic for the Finish-ICT Miracle, as Pajja (2001) has called it. During the last decade, Finland has become one of the worlds most successful technology-intensive countries, finding itself in the front rank of the worlds digital economies. In a decade, Finland went from being one of the least information and communication technologies specialized countries to become the single most specialized one. Currently the Finnish ICT sector, with Nokia as its locomotive, consists of some 6 thousand firms and accounts for approximately 10 percent of Finlands GDP (Rouvinen & Antilla 2003, p.87) and therefore have put Finland on the map of global economies. Determining for this raise of Finland is the development of a new growth path in this small Nordic country. Finland has managed to transform itself from a resource-based into a knowledge-based economy in a rather short period of time, especially without any major cutbacks in his highly developed welfare state system. The essential point of analysis in my essay deals with the question, how Finland managed to become one of the most successful ICT-countries in the world. How was it possible for this

small Nordic country to go through a structural change from forestry to ICT? Nowadays, about 6000 firms (mostly small and medium-siz
